

Early childhood education path FROM DAYCARE TO HOSPITAL and back

- ▶ Early childhood education can also be organised in a hospital.
- ▶ The child has the right to learn and play even in a hospital.
- ▶ Education planning requires information about the child.
- ▶ Close cooperation with guardians and permission for information transfer are key.
- ▶ The goal is the child's safety, joy and learning.
- ▶ Securing the child's ability to stay in touch with their daycare centre group even when hospitalised and recovering.
- ▶ Ensuring the continuum of learning between the hospital and daycare centre
